Don't worry about it. I was just sending for your information. David and I have a call at 11 with them and I will try after that to have a list from this but I will likely discuss it with you next week rather than later today. I think it will be safer if you have a smaller number, more like 10-15 that we work with on first.

Still confused - there are 25 Fields that are shaded & an additional 15 that are not. Are we just going with the 25?
